

LitConnect

# What is LitConnect?

LitConnect.net is an open-source blockchain network designed to facilitate the lending, mining, staking and trading of LitConnect (LCN) tokens

# Our Goals

What we are hoping to solve with the LitConnect project

## Cash Out

No more waiting days for a bank to convert your crypto to USD. We do it instantly.

## Pay

In order for a cryptocurrency to be useful, we must incorporate it into daily use. With the LCN debit card, this has never been easier.

## Relax

With traditional currency, you are being serialized and watched at all times. With LCN, nobody can see who is sending or receiving your payments except you.

01

### Anonymity

Bye, bye government control.

02

### Liquidation

Three seconds to convert LCN-USD.

03

### Payment

Buying with LCN is instant & secure.

# Why Use LitConnect?

This is what sets us apart from the rest

## Privacy

When making transactions with LCN, you are completely invisible. Not even the owners of LitConnect can see the senders or recipients of LitConnect payments.

## Integration

With a LitConnect debit card on its way in 2018, LCN can be seamlessly integrated into your daily purchases. Liquidating from LCN to USD will be instantaneous.

## Innovation

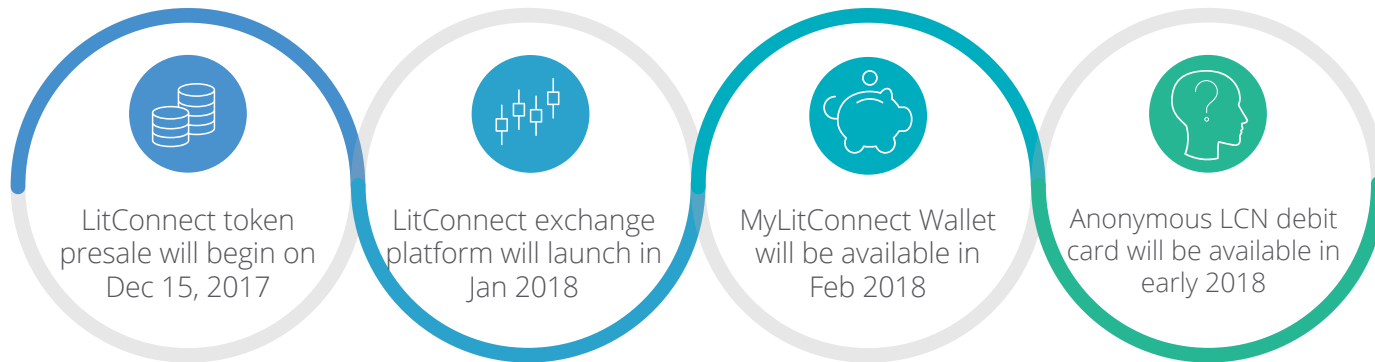

With an open-source, community-driven network like LitConnect, the future of the blockchain is in your hands. The potential for growth and innovation is only limited by your imagination.

## Security

Nobody controls your LCN tokens except you. Not a bank, not a government and not even the LitConnect company itself. You are in total possession of your tokens at all times and you are the only person with access to your private keys.

# Our Game Plan

There are four major milestones in our road to success

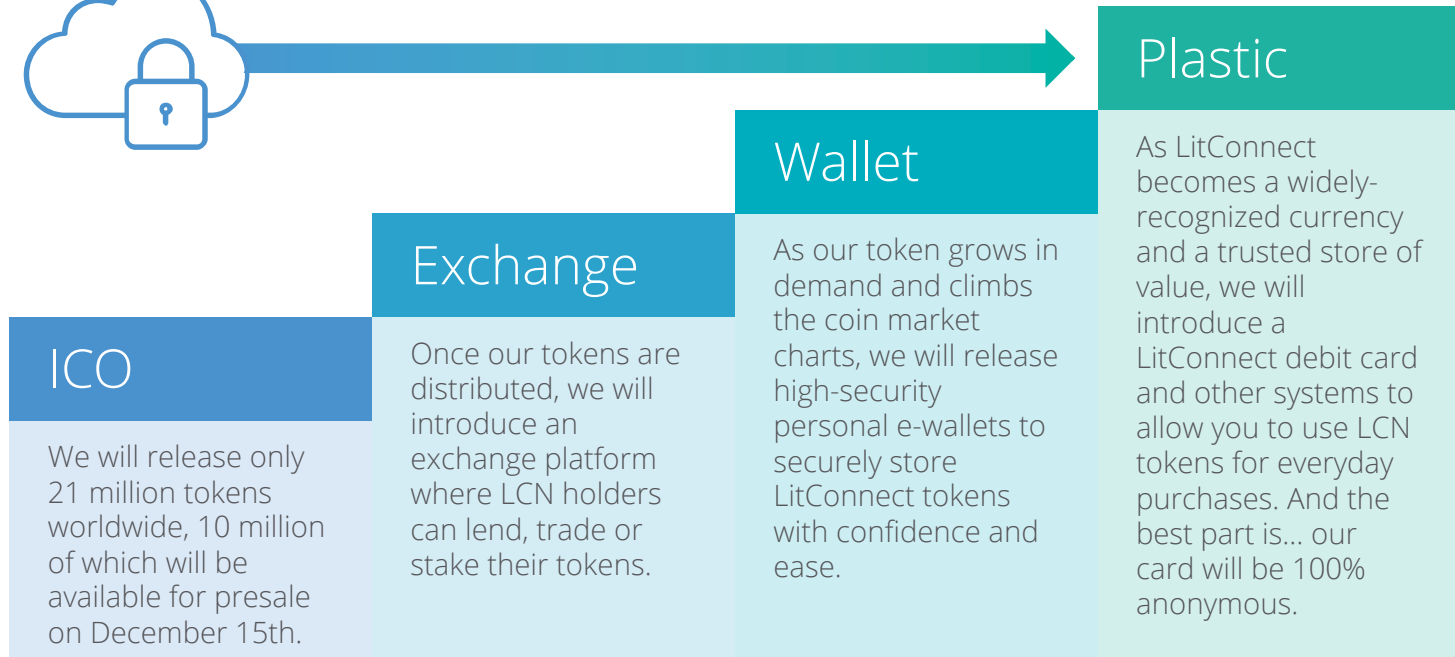

01 Launch the LitConnect ICO

02 Launch LitConnect Exchange

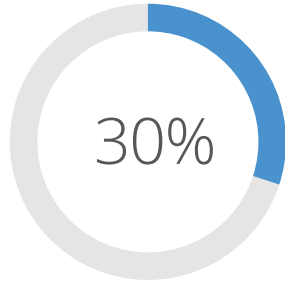

03 MyLitConnect Wallet

04 LitConnect Debit Card
